Examiner's Statement of Reasons for Allowance

1. Claims 1, 3, 7, 9-12 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to anticipate or make obvious the claimed invention. Specifically, the prior art fails to teach, in combination with the remaining elements as recited in claim 1:

The present invention is directed to a microstrip antenna.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art does not anticipate, nor does it suggest, the details that are claimed in the independent claims. Particularly when the claims are interpreted as argued by applicant on pages 6-7. These details are the same as disclosed in applicant's specification. These details, as now interpreted by the examiner in view of the applicant's remarks, that are not shown in the prior art include the support including wherein the radiating conductor and the ground conductor are cloth-like substances having flexibility and conductivity, and also the dielectric substrate is a cloth-like substance having flexibility and insulation property; and wherein the connection of the terminal of the feeding cable to the radiating conductor or the ground conductor is attained by soldering through a metallic plate-like substance adhered with conductive adhesives at a surface opposing to the radiating conductor or the ground conductor.

Claims 3, 7, 9-12 are allowed for depending on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
